

## At the Garden house

As part of our ASDAN Towards Independence course a group of students will visit the Garden House to work on independent living skills such as preparing a meal, making a hot drink, washing up and a variety of cleaning tasks including hoovering, polishing and sweeping outside. The house provides the ideal opportunity for learning independent living skills in a safe and appropriate environment. Pupils work both inside the house of daily living skills such as making the bed, cleaning the bathroom and toilet areas and will work outside tidying up the garden, or cleaning the windows.
